CSX needed to quickly procure several office facilities to meet space needs at several of its rail yards across the upper Midwest and East Coast to accommodate rail yard staff. Comark built and delivered an upgraded product during a six month period. The buildings range in size from 476 to 1,792 square feet, and provide a facility solution that can be relocated if the need arises.

The buildings have a hardi panel exterior with Merillat trim, aluminum decks, steps and ramps, and a TPO roof. Internally, space is divided into kitchen, office, conference and locker room facilities.
