With an excellent reputation for its education and program opportunities, Alamo Community College faced sharply increasing enrollment and drastic facilities needs to keep pace with growth. In late 2002, ACC turned to Comark to put together a modular classroom solution that would provide the space they needed fast and at a great value, while maintaining an open, un-congested feel to the learning environment.

Comark provided a full turnkey project to the college and implemented its 26 classroom solution in two phases: In Phase One, approximately 9,000 SF of classroom space was built, delivered and installed within 45 days of notice to proceed. In Phase Two, Comark provided 11,000 SF of classroom space, also built, delivered and installed within 45 days. Wide, attractive decking was used to connect the classrooms, creating an “educational boardwalk” feel to the modular campus, providing a quality learning environment to match the quality education students receive.

Project Summary:

Title & Location

Alamo Community College
Classrooms, San Antonio, Texas

Type of Facility

Education

Square Footage

20,000+

Construction Timeline

90 days
